ABOUT THE GROUPS

Chartered in 2005, the International Forum for Investor Education (<http://www.ifie.org>) is a unique alliance that brings together private sector and public sector providers of investor education to improve the global standards for investor education. The Forum is accomplishing this objective by serving as a clearinghouse for the exchange of information between providers of investor education from different jurisdictions, including organizations that are just beginning

to develop investor education programs. IFIE enables providers of investor education to learn about investment products and the investment process in the international financial market and about investor education programs globally. In addition, IFIE encourages providers of investor education to remain current with trends in investor education by disseminating relevant research and other materials in membership meetings and via a dedicated Web site and other channels.

The member agencies currently together in the International Organization of Securities Commissions (<http://www.iosco.org>) have resolved, through its permanent structures: to cooperate together to promote high standards of regulation in order to maintain just, efficient and sound markets; to exchange information on their respective experiences in order to promote the development of domestic markets; to unite their efforts to establish standards and an effective surveillance of international securities transactions; to provide mutual assistance to promote the integrity of the markets by a rigorous application of the standards and by effective enforcement against offenses.
